

NEWS & FACTS

April 2013

Delivery of the largest 4-roll plate bending machine with hydraulic top roll support.

**VRM-hy 3050-997 spez.
S-TR Supported-Top Roll**

“S-TR” stands for “Supported-Top Roll” and indicates a Haeusler 4-roll plate bending machine equipped with an active controlled, top roll support. This unique solution ensures the rolling of highest wall thicknesses at small bending radii far beyond the physical limits of standard machines.

Facts

- Maximum width of plate: 3050 mm
- Maximum top roll force: 15,000 kN
- Nominal bending capacity: 90 mm
- Weight of the machine: 150 t
- Other parameters on request
